Christian Tettschlag is an experienced professional in **IT transformation, requirements management, and process integration**, with a strong background in **IT consulting** and the **telecommunications industry**.

Professional Journey

Christian's career is characterized by building bridges between **business requirements and complex IT landscapes**. Early on, he developed a strong foundation in **requirements engineering**, working closely with business stakeholders, product owners, and technical teams to translate strategic goals into scalable, compliant IT solutions.

Over the years, his focus expanded toward **large-scale IT transformations**, where he took responsibility for aligning processes, systems, and governance models. A key aspect of his work has been supporting organizations during modernization initiatives—integrating legacy systems with digital platforms while ensuring operational stability.

Areas of Expertise

- **Requirements Management & Business Analysis** – Structuring complex requirements, moderating stakeholder alignment, and ensuring traceability from strategy to implementation.
- **IT Transformation & Process Integration** – Supporting end-to-end transformation programs, harmonizing processes across organizations, and enabling sustainable change.
- **Telecommunications Industry Experience** – Deep understanding of telecom-specific processes, platforms, and regulatory constraints.
- **Digital Platforms & CRM Systems** – Conception, design and optimization of customer-centric platforms, including CRM landscapes.
- **Data Protection & Compliance** – Strong focus on **GDPR/DSGVO compliance**, permission management, and data governance within digital ecosystems.

Professional Profile

Christian is known for his **structured, analytical approach**, combined with strong communication skills. He operates confidently at the intersection of **business, IT, and regulation**, making him a trusted partner for both management and technical teams. His work style emphasizes clarity, transparency and pragmatic solutions that deliver measurable business value.

Current Focus

Today, Christian continues to focus on **digital transformation initiatives**, particularly in regulated environments, where compliance, scalability, and user-centric design must go hand in hand. His professional journey reflects continuous learning, adaptability and a commitment to shaping future-ready IT landscapes.
